PROPOSED CAPITAL DEVELOPMENT COMPLEX 
AT THE POKFIELD ROAD SITE

INNOVATIVE PLANNING
Maximizes Flexibility for Faculty Academic Areas

2ND FLOOR PLAN (+91.5 mPD)

The CENTRAL ATRIUM organizes the Large floor plate and direct users to Academic Areas
PLEATED FACADE
is a high-performance modular curtain wall system with
low-maintenance requirements and low environmental
impact, reducing the need for additional cooling.

GREEN ROOF
releases water gently to
the soil and captures
the precipitation from
rain to reduce the urban
heat island effect.

THERMAL COMFORT
is achieved through
strategic placement of
insulation, shading devices,
and ventilation systems.

DAYLIGHT-FILLED ATRIUM
enhances daylight conditions for learning.

RAINWATER HARVESTING
reduces demand on
rainwater harvesting systems.

NATIVE PLANTS
adapted to local
conditions, requiring
minimal maintenance.

A SUSTAINABLE, GREEN and
ENVIRONMENTALLY FRIENDLY CAMPUS
Champions Healthy Building Design
and User Well-being

BALCONY & TERRACES
provide an outdoor space that
connects the learning environment
with the streets and nature.

BUILDING ON A SLOPE
benefits from the surrounding
landscape, enhancing the
aesthetics and connectivity.

SMART LIGHTING
optimizes energy
usage while maintaining a healthy
environment for learning.

HEALTHY STAIRCASE
promotes physical activity
and enhances the
aesthetics of the space.

INDOOR TREES
improve air quality
and create a
relaxing atmosphere.

GREEN SHELVES
enhance the green
environment and
create additional
storage spaces.

PASSIVE VENTILATION
improves air quality
and reduces energy
consumption.
